

# Advanced Processing of Metals and Materials (Sohn International Symposium), Thermo and Physicochemical Principles: Iron and Steel Making

Devoted to the iron and steel making sessions at the Sohn International Symposium, this volume covers alternative routes, blast furnace coke and coal; liquid steel processing and reactors; thermodynamics and kinetics; inclusions and steel cleanliness; casting; and modeling and processing. From the 2006 TMS Fall Extraction & Processing: Sohn International Symposium, held August 27 - 31, 2006, in San Diego, California.
