

Advanced Control of Chemical Processes 2000 (ADCHEM 2000) (IFAC Proceedings Volumes)

This Proceedings contains the papers presented at the IFAC Symposium on Advanced Control of Chemical Processes held in Pisa on 14 - 16 June 2000. This proceedings consists of three volumes with broad topic areas of: modeling and simulation, model based control, realtime optimization, process and control monitoring, process identification and process control applications and plantwide control. The specific papers subjects range from the specific to the general, ranging from general fault diagnosis to specific problems which affect the chemical industries.
